

PAYMENT METHODS

The payment methods available on the www.winafestival.com website are:

- Online payments (credit or debit card) through the **Openpay** payment gateway.

From our Ecommerce we do not capture, store or transmit transactional data. For this we have the services of **Openpay**, which is a certified payment platform; that guarantees the security of all transactions through encryption software, validation procedures and robust data protection measures at the banking level (PCI level 1 certification). That is why making payments on our website is safe.

If your payment is with PSE, the **Openpay** payment gateway is responsible for communicating directly with your bank through ACH, when paying through this channel, you are using the security processes of your own bank, which is the one that validates your password main and second key if it is the case.

Additional payment methods:

- Online payments (credit or debit card, foreign currency payments) through the Paypal payment gateway
